OBJECTIVE

Strategic and results-driven Data Analyst with a proven track record in the manufacturing and enterprise sectors. Expert in performing end-to-end needs analysis, identifying trends, and translating complex datasets into actionable business recommendations. Advanced proficiency in Power BI, SQL, and Excel, with hands-on experience in ETL processes and ERP environments. Adept at enforcing data governance and security protocols while driving continuous improvement through data-backed storytelling.

EDUCATION

BSc (Hons) in Information Technology Specializing in Data Science | SLIIT

2025 | 2nd Class Lower Division

G.C.E Advanced Level - 2020 | Royal College, Colombo 07

2012 – 2020 | Physical Science Stream

EXPERIENCE

Link Natural Products (Pvt.) Ltd – Dompe, Sri Lanka

Senior Data & ERP System Analyst | Jun 2026 – Present

- **SAP Implementation Leadership:** Spearhead the global SAP rollout as the core analytical lead for the Production Planning (PP) and Quality Management (QM) modules, while actively managing cross-functional technical integration with FICO, MM, and SD architectures.
- **Team Direction & Strategy:** Lead, mentor, and direct the data analytics team, establishing operational workflows, overseeing project deliverables, and driving the strategic transition from legacy descriptive reporting to advanced systems optimization.
- **Enterprise Data Architecture:** Direct high-level infrastructure projects, including managing Proof of Concept (POC) cloud-based data lakes to modernize sales forecasting and facilitate the transition from on-premises legacy systems.
- **Custom Solutions & Automation:** Architect and oversee the deployment of specialized manufacturing tools (such as Python/Flask-based hardware integrations) to bridge operational gaps and maintain continuous production efficiency during the ERP transition.

Data & ERP System Analyst | Feb 2025 – May 2026

- **Needs Analysis & Specification:** Lead cross-functional requirement gathering sessions to define KPIs; translate complex business needs into technical specification sheets for reporting.
- **End-to-End Data Lifecycle:** Identify, collect, and clean unstructured datasets to prepare high-fidelity models for executive analysis.
- **Trend & Pattern Recognition:** Analyze operational data to identify basic and emerging trends, defining new indexes to measure manufacturing efficiency and supply chain performance.
- **Value Creation:** Present data visualizations and strategic recommendations to stakeholders, resulting in improved process flows and cost-saving measures.
- **Data Governance & Ethics:** Enforce Group prescriptions on data security, integrity, and confidentiality, ensuring all reporting aligns with global ethics standards.
- **Mentorship:** Lead a small team of analysts, promoting internal best practices and maintaining rigorous documentation of analytical processes.

EXPERIENCE

Link Natural Products (Pvt.) Ltd – Dompe, Sri Lanka

Junior Data & ERP System Analyst | Aug 2024 – Feb 2025

- **Predictive Reporting:** Developed Power BI and Excel dashboards to visualize service and performance metrics, enabling proactive rather than reactive decision-making.
- **System Integration:** Supported ETL processes and data migration during SAP implementation, ensuring high data quality and consistency.
- **Continuous Improvement:** Identified root causes of operational errors and implemented corrective action plans to reduce recurrence.

Data Analyst (Internship) | Feb 2024 – Jul 2024

- Conducted data analysis and reporting to support business decisions.
- Developed and maintained SQL queries for data extraction and reporting.
- Assisted in ERP-related tasks and system documentation.

MAS Active Linea Intimo – Biyagama, Sri Lanka

Data Analyst (Internship) | Apr 2023 – Jan 2024

- Performed data analysis, cleansing, and visualization to support business requirements.
- Created SQL queries for automated reporting and data extraction.
- Assisted in ERP system documentation, data validation, and analytics deliverables.

CERTIFICATIONS

- **SAP Professional Fundamentals**
SAP | 2025 Feb
- **Understanding the Enterprise Systems Environment**
